A series of studies is intended to analyze policy issues and to 3 ASSESS THE RESULTS OF GENERAL EQUILIBRIUM STUDIES OF MULTILATERAL TRADE NEGOTIATIONS - Policy Issues in International Trade and Commodities, Study Series No. 3. Studies by UNCTAD staff, as well as by others, examine the effects of various policies and agreements on international trade and development. These studies include assessments of general equilibrium models, which evaluate the impacts of trade policies and negotiations on the global economy. The results of these studies help to inform discussions on policy issues in international trade, with a focus on multilateral trade negotiations. The purpose is to stimulate and promote research in this area, with the aim of improving public understanding of international economic issues.
